

Project – 2

Objective: In this project you are required to scrap the data for a Denmark based vendor, the company name is TrustPilot.

Trustpilot.com is a Danish consumer review website founded in Denmark in 2007 which hosts reviews of businesses worldwide. Nearly 1 million new reviews are posted each month.

In this project you are required to scrap data for specific services which are required to be presented to the client.

Below are the urls for the data you are required to fetch.

https://www.trustpilot.com/categories/financial_institution

https://www.trustpilot.com/categories/music_movies

https://www.trustpilot.com/categories/bars_cafes

https://www.trustpilot.com/categories/doctors_surgeons

<https://www.trustpilot.com/categories/hotels>

You are required to create sperate Excel Sheets for each of the service. The excel sheet should consist of the following data.

Sr No	Name	Trust Score	Total Reviews	Website Name	Location
-------	------	-------------	---------------	--------------	----------
